3 Common Myths About Sri Lanka

"It's a small island, so you can see everything in a few days."

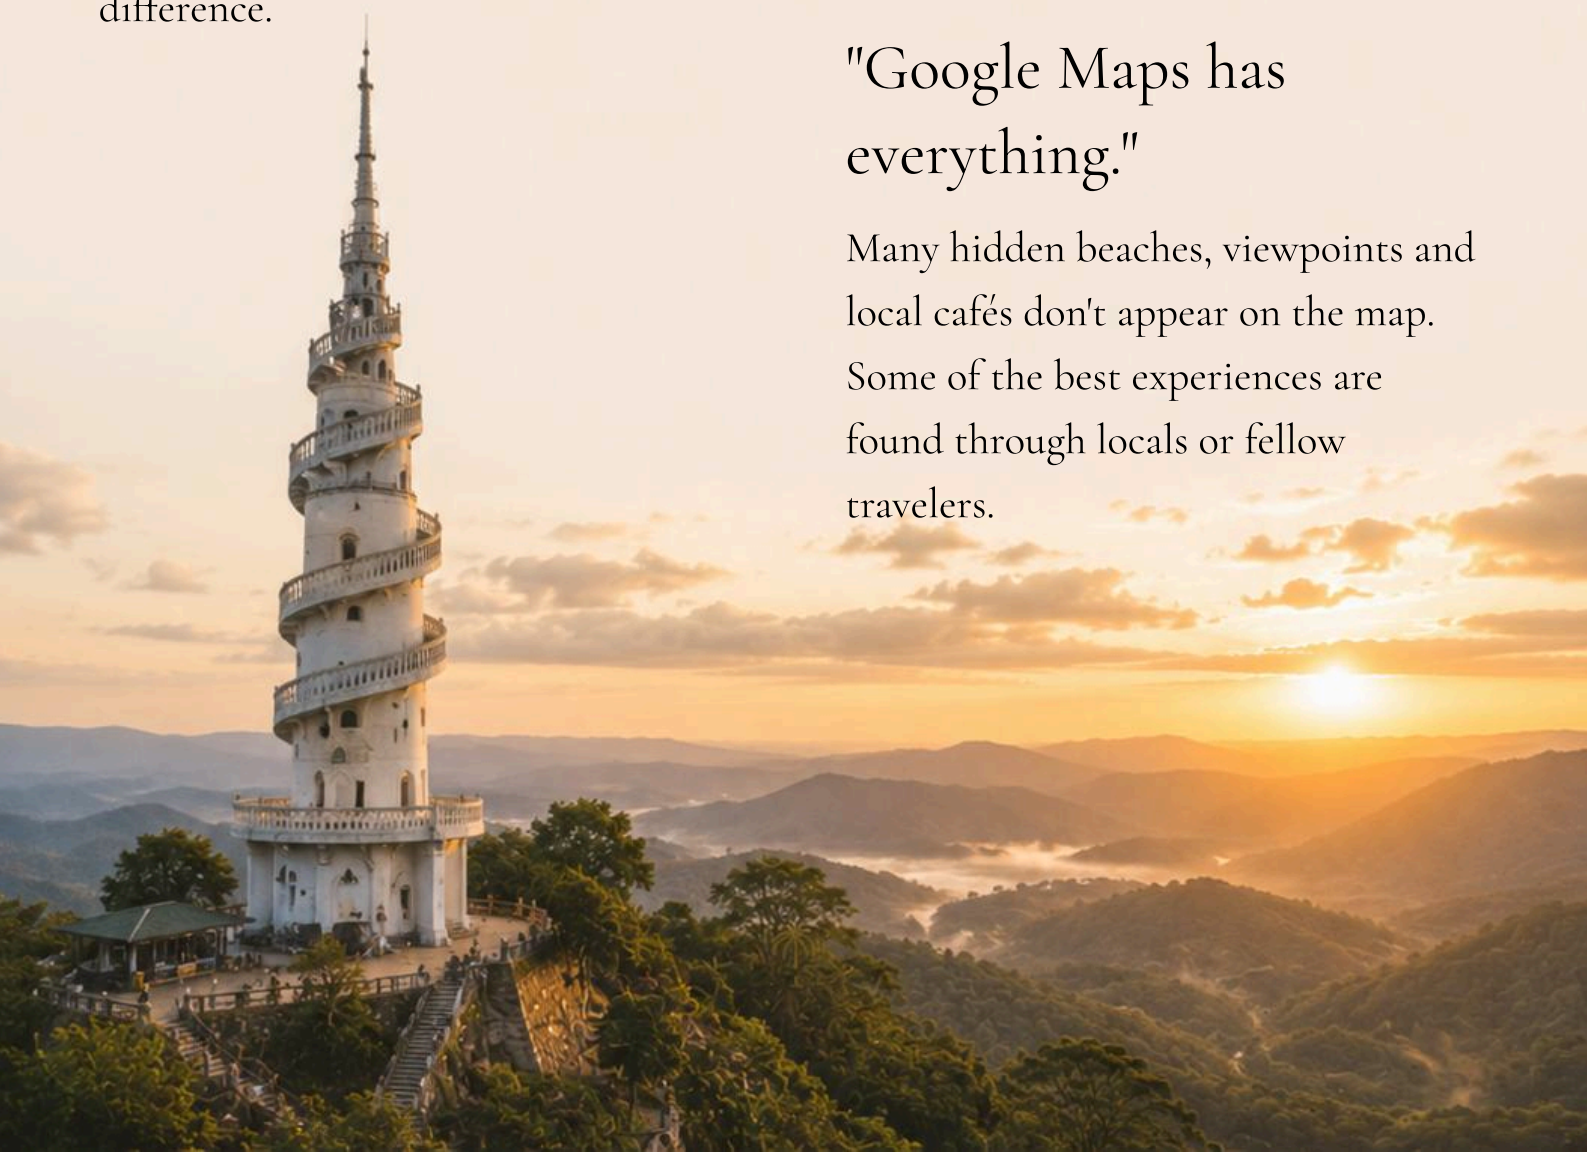

Although Sri Lanka looks small on the map, travel times are much longer than most people expect. A well-planned itinerary makes all the difference.

"The weather is the same everywhere."

Sri Lanka has two monsoon seasons, meaning one coast can be sunny while another experiences rain. The best time to visit depends on where you're going.

"Google Maps has everything."

Many hidden beaches, viewpoints and local cafés don't appear on the map. Some of the best experiences are found through locals or fellow travelers.

Final Thoughts

If I could give only one piece of advice, it would be this: don't rush. Spend at least three nights in Mirissa. Watching the sunrise there is one of my favorite travel memories.
